

Which Kube component, beginning with 'P', manages host subnetting and processes requests to containers?

- Processor
- Partition
- Parameter
- Proxy**

Which of the following, starting with 'L', does Kubernetes automatically manage for containers?

- Latency
- Live-streaming
- LAMP stacks
- Lifecycle**

To help your services stay online, which 'R' does Kubernetes automate in the event of an update going wrong?

- Rollout
- Rollin
- Rollforward
- Rollback**

Which 'L', external to Kubernetes, can grant end users direct access to worker nodes?

Lazy loader

Load balancer

Linker

Lineage manager

Which component of Kubernetes, starting with 'S', acts as an internal load-balancer, routing traffic internally?

Subnet

Service

Server

Scheduler

Which action on containerised applications, beginning with 'D', is K8s not capable of automating?

Duplication

Destruction

Degranelation

Deployment

Which two 'H's are automated by Kubernetes within the container lifecycle?

- Hosting and healing
- Health checking and hashing
- Healing and health checking
- Hosting and hashing

What 'A' is the type of program containerised by a runtime like Docker?

- Access programs
- Application programs
- Architecture programs
- Asynchronous programs

The filesystems of containers and pods are best described by which 'I'?

- Integrated
- Isolated
- Imported
- Irrational

What 'N' does a cluster consist of?

- Networks
- Nybbles
- Nubelets
- Nodes**

The control plane that instructs worker nodes is also known by what name, starting with 'M'?

- Mediator
- Machine instructor
- Master node**
- Management server

What name, beginning with 'S', is given to the control plane component that assigns workloads to nodes?

- Scheduler**
- Scanner
- Securer
- Sampler

Acting as the default gateway to the cluster, which 'A' disseminates information and commands between components?

- Alpha software
- Access point
- API server
- Active directory

What type of node, beginning with 'W', are the nodes that run containers?

- Worker
- Wireless
- Web-based
- Whitelisted

Kubernetes is now maintained by which 'C'?

- Cloud National Container Federation
- Cloud Computer Management Corporation
- Cloud Native Computing Foundation
- Container Orchestration Network Company

K8s is compatible with on-premise, hybrid, and cloud infrastructure, making it which of the following, beginning with 'P'?

- Proprietary
- ☒ Portable
- Private
- Pricy

The component of a worker node that instructs the container runtime is known by what 'K'?

- Kube-proxy
- ☒ Kubelet
- Kube-apiserver
- Kubect!

Congratulations! You have successfully completed this lab!
